SOME STYLING OPTIONS FOR EDITING YOUR PHOTOS

Every image is different. The same editing style won't work with every image. Take a look at the ideas here and tell me which look you would like me to try and achieve when I edit your photo. I will start with your preference and then contact you directly in our private community to show you some options for your image. We can go back and forth a bit to select the final version or get on a screensharing chat and do a live edit together.

As it were - light edit just to clean up colors, contrast and focus

Creative Color Cast

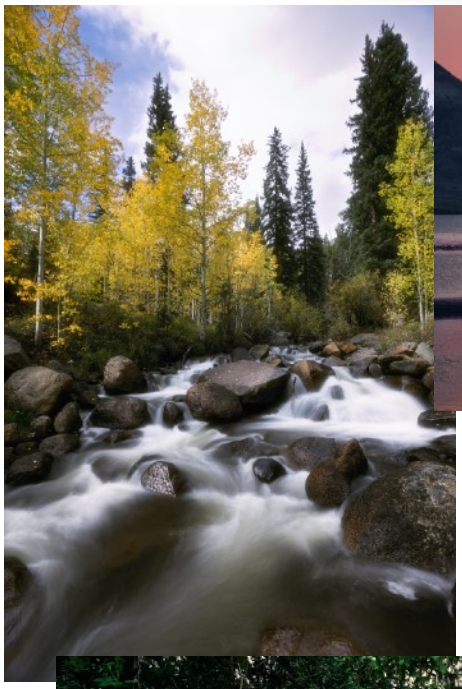
Embellished Tones - accent mood & strengthen existing colors

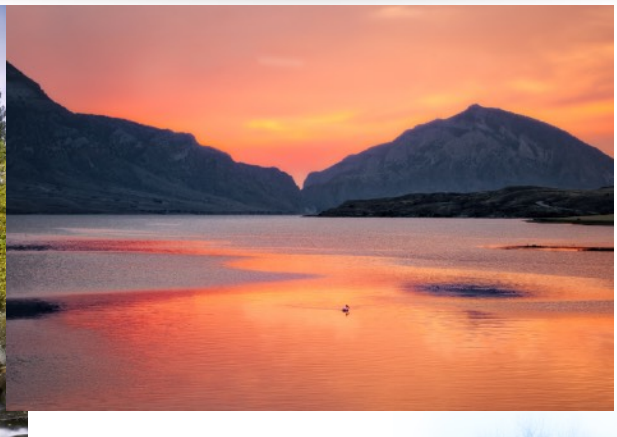
Desaturated Coffee

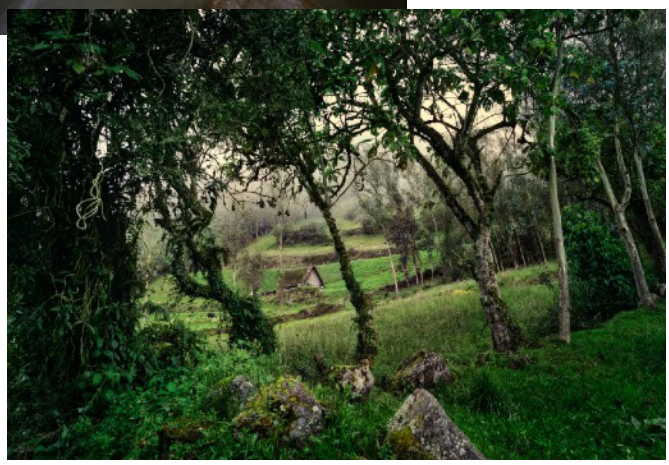
Black and White Low Key - more blacks

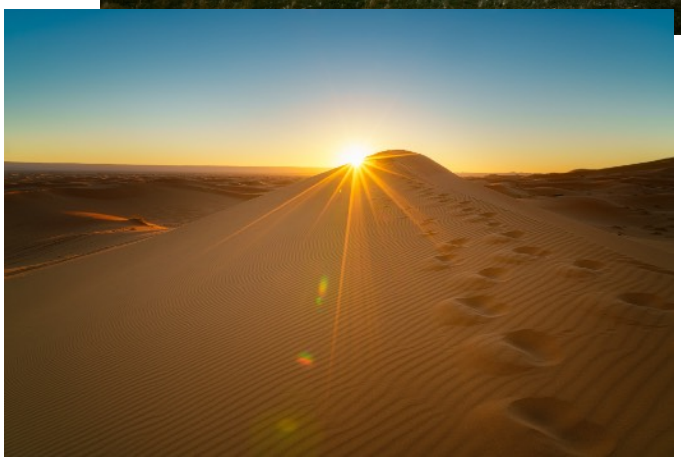
Black and White High Key - more whites

Dramatic Light - brighter whites and darker shadows

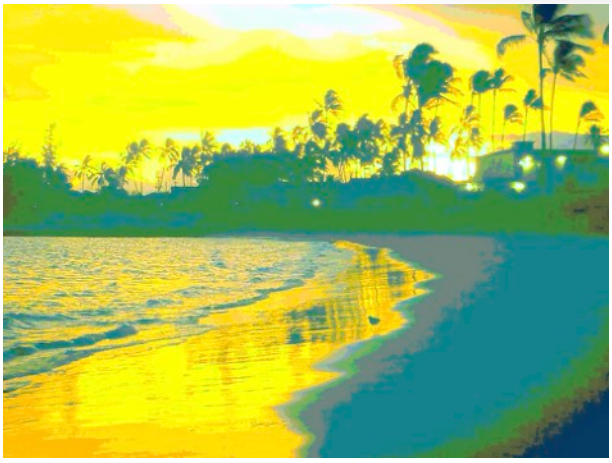


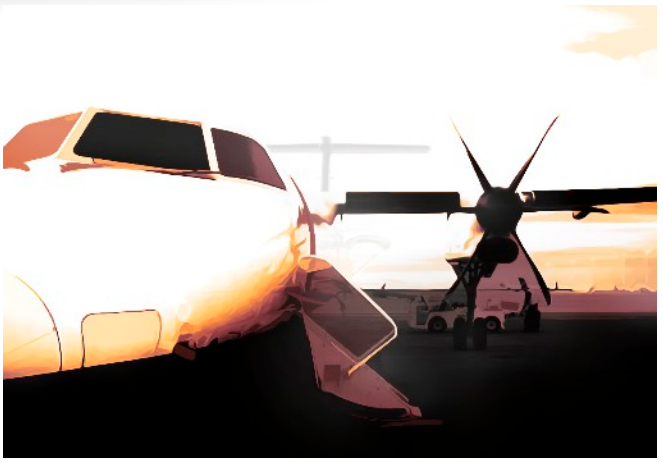






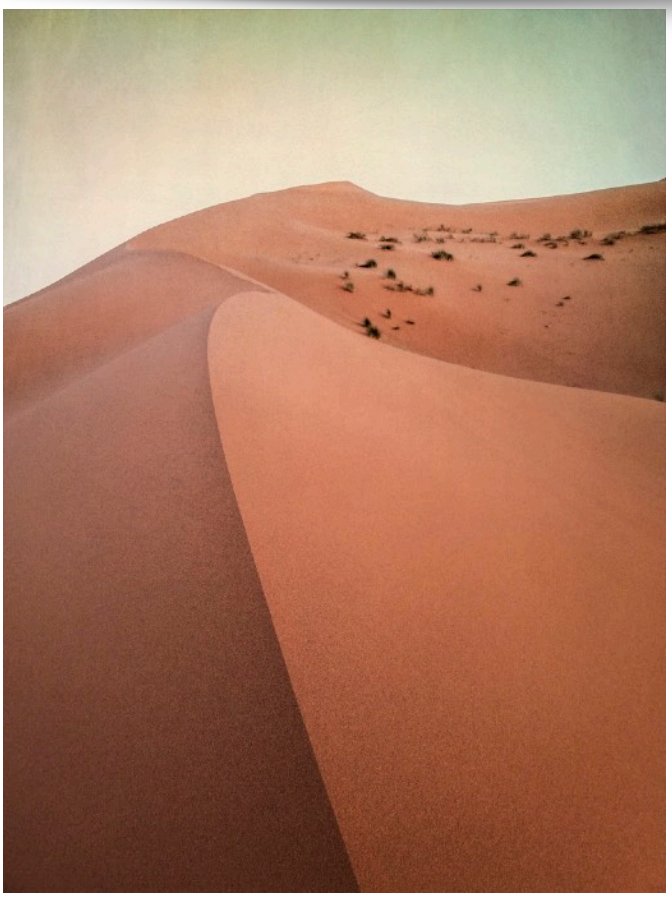
Pop Art - stylized blocks of color

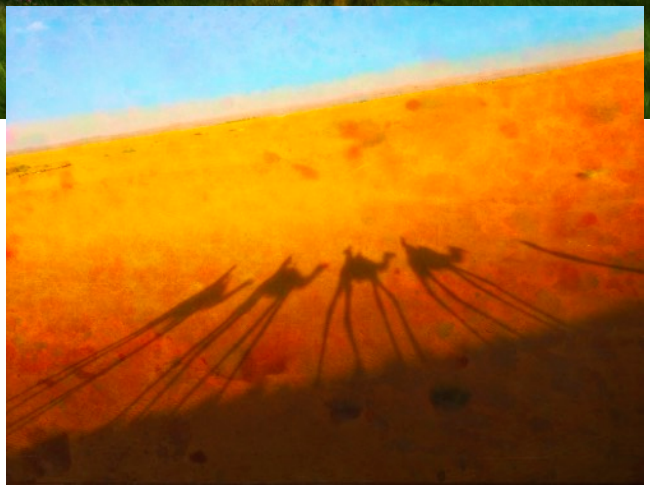




Selective Color - black & white with limited other colors visible

Creative Texture - enhance the mood or remove distractions





Painterly - brush strokes as if it's a painting

Something Else? Upload a go-by image with a style or color toning you like

We can only print images that you own the rights to reproduce. Here are a couple of examples. Upload an image and give me a short description of what you like about it

- I like the soft pastel tones of the sailboat image.
- I like the strong directional light and mood of the Rembrandt with Jesus on the Sea of Galilee
